

William Mentz, Jr.

Durham, NC 27707 | wmentzjr@gmail.com | LinkedIn

Statistical Science graduate student with 2+ years of corporate experience as a Business Analyst. Poised to contribute to a fast-paced, collaborative environment that needs strong data science skills.

Education

DUKE UNIVERSITY | Durham, NC

Master of Statistical Science

Expected May 2027

- **Relevant courses:** Predictive Modeling, Theory of Statistical Inference, Bayesian Statistical Modeling, Applied Stochastic Processes, Programming for Statistical Science, Real Analysis, Time Series, Survival Analysis

LOYOLA UNIVERSITY NEW ORLEANS | New Orleans, LA

Cumulative GPA: 3.994/4.00

Bachelor of Business Administration (major: Business Analytics)

May 2023

Bachelor of Arts (major: Music)

May 2023

Work Experience

Teaching Assistant, Duke University

August 2026 – Present

- Serve as a teaching assistant for graduate course STA 523 – Statistical Programming (R Programming)

Business Analyst, Intralox, Harahan, LA

May 2023 – August 2025

- Served as the singular Power BI reporting resource for the customer service department for this world leading provider of conveyance solutions. Assisted in monitoring metrics and productivities of customer service representatives globally
- Developed and maintained data pipelines for analysts, ensuring data integrity and consistency
- Collaborated with the data management team in maintaining clean and accurate data between two databases

Undergraduate Catalyst Intern, Ochsner Health System, New Orleans, LA

May 2022 – July 2022

- Created an ARMA regression model estimating the association between hospital population and average hotel occupancy and predicting future occupancy of the Brent House Hotel

Projects

E Pluribus Unum: From Orchestral Pieces to Solo Works – In Preparation (First author)

- Created an interpretable and controllable algorithm to reduce polyphonic (multi-lined) musical scores to faithful monophonic (single-lined) arrangements

The LPO Meets Data: An Analysis of the Louisiana Philharmonic Orchestra – Honors Thesis

- Collected sales and program data from the local symphony orchestra to create a forecasting model
- Discovered that the orchestra's classical music-focused concerts are associated with an 11.6% to 23.2% lower revenue, on average, than their more popular concerts when controlling for a variety of concert and seasonal factors

The Modern Educational Disparity – Econometrics Research Paper

- Utilized General Social Survey data to find that there is a disproportionate association between a United States citizen's cultural background and their average educational attainment
- Investigated reasons behind the disproportionate educational attainment for different backgrounds

Skills

- **Technical:** Statistical Programming - R, Python, SQL; Bayesian Statistics; Regression Analysis; Time Series Analysis; Microsoft Power BI
- **Professional:** Teamwork, Problem Solving, Time Management
